To whom it may concern,

I would like to recommend Eulas Thomas as a candidate for a position within your organization. In his position as Mill Operations Supervisor at Molycorp Minerals, I worked with Eulas on several projects surrounding the Paste Tails Facility.

As a Project Engineer for Molycorp, it was critical that I communicated and received assistance from the Operations teams. Eulas was always very welcoming of my presence in his area and helpful in whatever way he could be to help me and Molycorp be successful.

Eulas was also a much respected individual by management and also his employees. Eulas was very knowledgeable of the process and would be a great addition to any organization.

Sincerely,

Caleb Brown
